Full Stack Developer with experience in web and mobile, working with TypeScript, Node.js, React and AWS, focused on scalable solutions, messaging systems and high-performance applications.

Professional Experience

R1 Engenharia — Full Stack Developer

Mar/2025 – Present

- Implemented an offline-first architecture in a **React Native (Expo)** mobile app for **1,000+ users**, enabling operation without connectivity and automatic syncing of **300+ records/day**.
- Built a cross-platform **design system** with independent packages for web and mobile, published as private packages through a **CI/CD** pipeline, standardizing the interface and eliminating UI rework across teams.
- Developed custom interactive dashboards and independent microfrontends with **React.js**, **TypeScript** and **Module Federation** for autonomous deployment.
- Designed a distributed report generation system with **AWS SQS/SNS** queues for asynchronous processing and a Python worker for document generation.

Akler — Full Stack Developer

Oct/2023 – Mar/2025

- Developed a reporting microservice that **reduced processing time by ~60%** and mobile applications with Flutter and Jetpack Compose.
- Optimized API performance with Redis caching, **reducing latency from 800ms to 120ms**.
- Architected a full-stack application (Svelte 4, Supabase, Tailwind) and RESTful APIs documented with Swagger.
- Implemented an event-driven architecture with **Kafka** and **BullMQ**, **processing 20–40 thousand events/day**.
- Automated deployments with Jenkins and contributed to the team's technical and architectural decisions.

Hitechline Tecnologia — Full Stack Developer

Sep/2021 – Sep/2023

- Developed native Android applications with Jetpack Compose and web apps with React.js, **Next.js** and Tailwind CSS, **serving 2,000+ users**.
- Implemented RESTful APIs using Node.js, Express and Prisma, integrating **PostgreSQL** and **MongoDB**.
- Integrated payment gateways (Asaas and Stripe) and messaging systems with Kafka and BullMQ.
- Set up infrastructure with **Nginx** as a reverse proxy and **CI/CD** pipelines with **GitHub Actions**.

Education

- **Systems Analysis and Development** — Universidade Vila Velha (2023 – 2025)

Courses

- **Full Cycle** — Software architecture, microservices and clean architecture
- **Rocketseat** — Specialization in Node.js, React.js, Next.js and the TypeScript ecosystem.
